

MARCH 11TH - 14TH

2 TO

Skule Nite

U OF T ENGINEERING'S
SKETCH COMEDY MYSTICAL REVUE

HART HOUSE THEATRE

HISTORY

2020 marks the 99th anniversary of the Skule Nite tradition. In 1921, the School of Practical Science (SPS) at the University of Toronto staged a variety show called Ngynyrs in SPaSm at Toronto's Massey Hall. The stunt show was a combination of music and theatrics, and it was an instant success. After only two years at Massey Hall, Ngynyrs in SPaSm moved to Hart House Theatre as part of an effort to bring women into the then men-only Hart House.

Over the years, the musical variety show transformed into a one-night open house that was meant to display the large cross-section of skills possessed by engineers, including sports, arts, music, and theatre. Eventually, the theatrical component assumed a dominant role, and Skule Nite evolved into one of the biggest annual events on campus. Full terms would be spent building elaborate sets and costumes, and the most talented actors from all faculties were sought out and recruited into the production. Sadly, the urge to become bigger and better each year collapsed the show in 1968.

However, four years later, the idea was revived. The 1973 show witnessed Skule Nite going back to its roots as a series of short musical and comedy sketches performed by engineers. Over the last two decades, Skule Nite's reputation as a hilarious and professional musical comedy has grown. Today, the annually sold-out show is a staple of the Hart House Theatre roster and a Toronto audience favourite.

WELCOME

What happens when you mix hilarious sketch comedy, show-stopping musical numbers, and the magic of Hollywood together? No seriously, what happens? We've yet to figure it out. But in the meantime, there's SKULE NITE! A night filled with jaw-dropping, laugh out loud, 100% organic free-range entertainment. Every Skule Nite is a year-long undertaking in which engineering students and graduates create the entire show—that's right, the sketch-writing, orchestra-arranging, music-playing, set-building, costume-sewing, dance-choreographing, paint-painting, light-designing, sound-effecting, vocal-directing, stage-managing, stage-crewing, funny-acting, furious-producing, and insane-directing is done by students who are passionate about making every Skule Nite the best Skule Nite ever!

So sit back, relax, and laugh until you puke all over yourself. Then please... clean yourself up. Really, that's just disgusting.

DISCLAIMER

Skule Nite is a musical comedy revue specifically designed for maximum offensive capacity. All opinions expressed in the show do not necessarily reflect those of the directors, writers, actors, dog-walkers, or any reasonable person. If anyone has taken any sort of offense to the content of the show, we suggest you do not pursue legal action. We simply can't afford it. Besides, we don't care!

DIRECTOR

Jenny Graydon

When I joined Skule Nite the show felt magical, and I'm happy to report that six years later, it still does. This has been, by far, the most impossible and most amazing experience of my life. From a first year scared to sing on stage, to working with a talented cast of my own, I'm forever grateful for this experience and to every member of the Skule Nite family.

Cast, I'm so proud of you. You surpassed every expectation I had of you as performers, and did so with positivity and enthusiasm. You each brought your own unique charm to this show and working with you warmed my heart.

Special thanks to Seif and Jon as passionate and dedicated Producers, Sinan and Michael as caring Stage Managers, to every member of the crew and band, and to the Creative Team for their drive, talent, and love for the show. I feel incredibly lucky to have worked with you all. To my Mom, family, and partner Sean, thank you for your infinite support. Lastly, I'd like to thank Julia Lobo, who stood beside me in that first year of Skule Nite, and now stands beside me in my last, as my creative counterpart and lifelong friend.

Enjoy the show Skule, we love you!

ASST DIRECTOR

Julia Lobo

To convey my feelings about Skule Nite in a teensy paragraph? An impossible task. Almost as impossible as assistant directing Skule Nite 2TO would have sounded to me as a first-year cast in 2014. I will be forever grateful to Skule Nite for teaching me to own my moments in front of an audience, and for introducing me to so many kindred spirits.

To the cast, you have been tickling me with your talent since our first rehearsal in GB202. Thank you for warming my heart every step of the way. Thank you to Seif and Jon for steering the logistics of the show but also so much more, to Sinan and Mike for being passionate captains of the crew, and to the creative team for going over and above to help bring the show to life.

Thank you to my family for keeping me sane, making sure I always ate properly and had a ride to the subway. Mad love to my boy Johnny McG who always lifts me up. And finally, thank you to Jenny Graydon. For being the most amazing collaborator, whether it be conjuring song pitches, conducting surgeries on the show order, or spilling the tea in public spaces. I couldn't have asked for a better accomplice.

And thank you to YOU, for supporting the show!!

PRODUCER

Seif Sarofim

Hi, Hello!! Welcome to Skule Nite 2TO!! I hope you enjoy the show as much as I enjoyed going into work late to make it happen!

I'd like to thank Jenny & Julia for trusting me with their vision of the show, dealing with my horrible creative ideas and letting me reorganize our Google Drive into the masterpiece that it is. Jon for keeping me in check and making my caffeine problem seem insignificant compared to his.

It's easy for me to get lost in the logistics and forget about the purpose of the show. Thanks to the incredible creative team, crew, cast, band and fossils, that was not the case. This group of people who boldly pursue their version of the arts reminds me of my own.

Through them, I've realized what an accomplishment it is for this show to be running for almost 100 years. How? You'd think I have an answer to that after producing it. Nope, I'm just as clueless as you.

Now if you'll excuse me, I have 4 more days of only talking about Skule Nite to take advantage of!

ASST PRODUCER

Jon Norman

As a clueless volunteer, I was told to cut out one thousand cardboard triangles for a godzilla costume. That was five years ago and I've been hooked ever since. This show has been my favourite part of SkuleTM and it has been a privilege to spend my final year of it working alongside Jenny, Seif, and Julia to make it happen.

Skule Nite means different things to everyone involved. For me, it has always been about the people I meet through it. Coming from the notoriously small MSE department, this show broadens my traditionally narrow sphere of interaction and has introduced me to countless unique and inspirational individuals that I otherwise never would have met.

For all the students reading this blurb, there is a place for everyone in Skule Nite and I hope you all reach out to get involved in next year's 100th anniversary of the show.

CAST

Andrew Barton

2T3 + T1

When Andrew joined Skule Nite, he didn't know how to dance. Unfortunately for him, some things just never change.

Chloe Oriotis

2T0 + MECH

Chloe lives by one rule: always embarrass yourself before anyone else gets the chance to. Case in point: the next few hours.

Erin Richardson

2T1 + ENGSCI

Erin is really excited for show week. So are her roommates and neighbors. Maybe then they won't have to listen to her belting show tunes every time she takes a shower.

Jacob Foster

2T0 + CHEM

To this day, the directors are trying to figure out if Jacob is actually in fact two grade 4's stacked atop each other... the choreographers say it would explain his dancing abilities

Jacqueline Amoranto

2T1 + ENGSCI

A maladroit thespian. She is best known for her roles: "tongue-tied" in "ordering at an eating establishment", "persistently late" in "the 9 am lecture", and "why am I sweating" in "this is the 5th floor of Myhal".

Josh Davis

1T7 + PEY + 1/2

Josh eats all of his exams because he knows that the only way he's passing them is through his bowels. The script for tonight was halfway down his throat before he was told he only had to perform it.

Karma Sadhwani

2T3 + CHEM

Karma called in "sick" three months ago, no one has seen her since then. The directors really hope she'll be back in time for the show. IF YOU'RE READING THIS KARMA, PLEASE COME BACK.

Kieran Kasha

2T3 + ENGSCI

Kieran, a rad mad lad clad in plaid, starter of fads, joker of dads, defen der of chads, enlarger of gonads, making haters sad, and if he might add, to be part of skule nite he is eternally glad.

Mackenzie Seward

2T1 + ENGSCI

Mackenzie is super excited for you to see the show. In fact, she'll be distributing a quiz about the performance to make sure you watch every minute of it. Just kidding, she won't. Probably.

Rhythm Loomba

2T3 + ENGSCI

Rhythm has been in several musicals before. As a child, she was on Broadway. She is the youngest EGOT ever and has a 5.0 GPA. Rhythm hopes people will believe everything they read in a program.

Stephanie McDonald

2T0 + PEY + MECH

Though it may be convincing, don't be fooled. Steph is actually controlled by a colony of bees settled in Newfoundland.

Thomas Dell

2T1 + ENGSCI

Thomas has only returned to his home planet once: to witness the twin sunsets on the beaches of Bartakhhlith, but also to disappoint his mother one last time.

Venkat Vivekanandan

2T2 + INDY

Venkat;noun \ven\’kat\ - average sized domesticated carnivorous human with soft hair, large snout and chubby fingers. Venkats are widely kept as pets or for comedic purposes.(Not affiliated with cat)

Anya Banning

2T1 + MECH

Describe Anya in 200 characters? What a task. 200. Yup. 200. That is... a number. She is just sooooooo... uhhhhh-hh... interesting. Yes. Interesting. And... now it looks like we're out of space. Oh noooo.

MUSIC DIRECTOR

Katherine Mao

I joined Skule Nite in first year as a way to stay involved in music while pursuing an Engineering degree. What I found was this amazing (and deceptively large) community of people who care about this place we call Skule and about creating this show that is relatable and funny and spectacular just for the sake

of it. I felt the passion and the dedication of everyone involved, and I knew this place was something really special. Working with the Creative team has been such a humbling experience, and I am so honoured to be part of bringing the Directors' vision to life. As *Band Mom*, I am so incredibly proud of my musicians. They are such a talented, hard working, and enthusiastic group, and it has been such a pleasure to work with them this year. Through all the stress and craziness that comes with putting together a show, my band keeps me going. Enjoy the show!

MUSICAL ARRANGEMENTS

When You Have an Eng Degree

Arrangement By: Alex Buck
Original Song: Welcome to the Renaissance from "Something Rotten!"

It Was Fucked

Arrangement By: Alex Perelgut
Original Song: Turn It Off from "The Book of Mormon"

S.H.I.T!

Arrangement By: Nicholas Popowich
Original Song: Reefer Madness from "Reefer Madness"

Finish Your Part

Arrangement By: Alex Buck
Original Song: Don't Break the Rules from "Catch Me if You Can"

Intermission

Arrangement By:
Stephen Manion & Sergio Dhelomme
Song: Don't Stop Me Now by Queen

Engineering's Greatest Breakthrough

Arrangement By: Alex Perelgut
Original Song: Alexander Hamilton from "Alexander Hamilton"

Reading Week

Arrangement By: William Pei
Original Song: Voulez Vous from "Mamma Mia!"

Give Them a Zero

Arrangement By: Katherine Mao
Original Song: Zero to Hero from "Hercules"

I'm an Engineer!

Arrangement By: Katherine Mao
Original Song: I'm an Islander from "Come from Away"

STAGE MANAGER

I wanted this space to be filled with pictures of crew working, but alas. I want you to look at the stage and pay attention to details. Every sound, set piece, light, costume and prop... Now I want you to flip the page and look at the faces of crew brains. Those are the people who have put in months into perfecting everything you just paid attention to. I want to give a special shoutout to the Ninjas, who get involved very late in the game and yet play a crucial part in the show. Michael has done a fantastic job leading them. Jenny and Julia drove me crazy, and Seif and Jon kept me sane. The result is a crazy good show.

SONG LYRICS

When You Have An Eng Degree

A world with poor logic
and bad designs
Manual data systems.
Broken bridges, corrupted files.
Nobody knows how to fix them.
So slow and moronic. So dull and mundane.
That is so inefficient.
That is so not our program.

When you have an Eng degree,
You'll learn the skills that can make money.
You'll make an impact,
By using all your knowledge
To better the world
It pays off when you choose to be a nerd.

When you have an Eng degree,
It's more impressive than a PhD.
We're so impressive
The smartest and the greatest,
We know we're the shit
Too hot for you

When you have an Eng degree
You're in a league that's cool!

Yes we deal with complex math and sciences,
We build your fancy smartphones and appliances.
We're working on plant-based meat.
And making better vaccines.
And we still find time to hit the gym.

While your friends write essays,
and Trump tweets dumb shit.
You'll get to launch start-

ups while you're in school.
Try not to drool!

When you have an Eng degree
You'll be the top dog in industry.
That's right you'll make bank.
And pay back all your OSAP, in under a year
Your path is clear
When you have an Eng degree
Everything's easy.

Hey look our robot's smoking
Man it's frying!
What's it cooking?
No it's trying to walk from here to over there.
We're screwed.

Hey look our code's compiling
But your laptop!
It's dying!
Well at least you saved the file?
I forgot!
We're so screwed.

Shit!- we might fail. This work is too tough.
We're dozing off and we have not done much.
We need caffeine, so much caffeine
Or we will never make it.
Red Bull. Red Bull.

Try google, try google,
Try google, try google (louder)
No wifi, no wifi (louder)
God dammit, god dammit (louder)

We're so sleep deprived,
And our GPA sucks
We don't have the time to do
Things that we love (God dammit, god dammit)
Things that we love (God dammit, god dammit, god dammit, god dammit)

When you have an Eng degree,
You'll be a master of technology
A modern einstein
You'll always have the answers
And won't make mistakes.
Cause you'll be great.
When you have an Eng degree,
Life is so easy.

Don't listen to them,
they're lying!

It Was Fucked

I did no learning
Which was concerning
Thinking about it still makes me squirm
The questions are pure evil
They should be illegal

You are gonna have a shitty term
If you had the choice
I'd say run while you can
But it's a required course
So just understand

It was fucked! But it's done now
And I passed
Though I have no idea how
Cause your dad was the prof!

Shhh!
This course resembles
A wicked curse
Like getting a brazillian wax
But even worse!

It was fucked!
But it's over, Jesus christ
Now I can finally get on with my life
It was fucked!
It Was Fucked!

I TA'ed for this course, the prof showed no remorse, I once asked him if he thought students would fail
He said he didn't care, cause life's not fair, But true engineers would surely prevail
I marked the tests and counted only 13 passes, The prof said "they'd better like summer classes!"

It was fucked
 Fucked!
The students were so confused
 Heck, you're probably gonna fail too

During my PhD I wanted something easy (Oooh, easy)
So I took this class thinking it could be cool (it could be cool)
But as the lectures progressed
To my peers I confessed This work was the hardest shit I'd seen in school
At one point the prof made all the students cry So take my advice...

I'm gonna switch to Artsci
WOAH!

Engineering's hard But artsci is trash So just ignore The glaring fact That It was fucked
It was fucked

Yay!
It was hell, (it was shit)
You may fail, (so good luck)
It was fucked, (it was fucked)
But will be over one day (one day)
And then you will be able to say (you'll say)
To the frosh next year

I've taken this before just wanna
Let you know
That this course is awful And will truly blow

It was fucked
It's the most difficult course
That you'll ever take in your
It Was Fucked
It Was Fucked
Glad it's over
Guess I'm fucked! (fucked!)

S.H.I.T!

Houses next to Beverly are filled with rats and mice
Before you give your first and last I'm begging you think twice
Horrendously maintained covered in grime and pure decay
Try your best to avoid it but you cannot get away from Student Housing in Toronto

Student Housing in Toronto
A waste land

Hello Friend, my name's Steve!
I will be your landlord let me help you sign your name here on this dotted line
Now, you've signed, I'm inclined, to inform you that I'm useless
You're in hell, and now your precious soul is mine!

I'm your neighbor...

Student housing in Toronto! Bet you wish you bought a condo!
We'll move in!

Text your landlord don't expect him to give any fucks
If you lived in Guelph your rent would be 100 bucks

Outdated smoke detectors, front doors held by just one screw!
Your roommate clogged the toilet and then left it

there for you!
Plunge!
Your commuter friends take pity! On a house that's in the city!
What the FUCK!
All your pipes! They will burst!
Your heat will turn off in winter
for the one week that we hit a record low
Money washed down the drain you will sing this sad refrain,

When you step into your shoe you'll find a roach!
I love roaches.

Student housing in Toronto , Student housing in Toronto!

Get me out!

Poorly designed, overpriced, there's garbage on your lawn
Reconsider commuting from Oshawa or Vaughan.
Dirty dishes piling high, rats living in your floor!
For the next four years this is the best you can afford!
Noooooooooooo!

You are stuck and cannot control, living here inside this butt hole
Move back home!

Moldy showers! (Student housing)
Swarming bed bugs! (Student housing)
Condom wrappers! (Student housing)
Giant roaches! (Student housing)

Smelly, dirty, spooky, grimey
Welcome to the rest of your life
NOOOOO!!!

Finish Your Part

Well we started this on monday when the sections were assigned

But now it's friday night the only section done is mine

Well I'm sure there is a reason

Why your work's not on the doc

So I figured we could all meet here and have a little talk

And I don't want to seem angry but we do have to submit

And we're all gonna fail this if you haven't done your shit!

Now you said you'd do the intro when we meet three days ago

You said it would be easy, but WHERE IS IT, I DON'T KNOW!

Well I have to tell you something but just please don't scream at me. I never actually did it, I was playing smash with Steve.

Well you left it way too late, so now you had better start, Cause we're all gonna fail this if you haven't done your part!

(Finish your shit)

You're slacking off and that is so not cool.

(Finish your shit)

You should be on the doc not puffin on your juul

(Finish your shit)

It's due tonight and you have only just begun

Fucking hurry up, get your shit done

Mark you said you'd do the figures, all the graphs, and all the plots (The plots) Could you kindly paste them in, I'd like to share my thoughts (Sharing our thoughts)

You also said you'd do our reference section on the chat (The chat)

I'm sorry to be honest I have done just none of that (What?!)

Well I won't get caught for cheating, because you couldn't cite your source You'd better start working or we're gonna fail this course. (Cause the dead)

The deadlines fast approaching friends Look other groups are done (They're done, cause they all)

They all chose to put school work first And now they're having fun (Live from campus, hello my friends)

What's up gamerz, welcome back, my live stream is a hit (Wait are you serious, are you fuck) Are you fucking kidding me? Can you please finish your shit? (Yeah!)

Guys I need a break im stressed out Who wants to go get Tims?

If you don't come with me then you'll be sittin here with him

(Finish your shit)
This was supposed to be an easy mark
(Finish your shit)
But there's three minutes left our futures looking dark
(Finish your shit)
In the results there's just the number 39

There's no way we'll get this done on time

You have been so damned annoying Since the day we joined this class You've been such a freakin buzz kill and a huge pain in my ass You complain about our sections But YOURS ARE SHITTY

TOO

So instead of bitching in our face, start focusing on you

Shit, there's no more time to argue,

Just take a look at that damn clock

Can we all just please begin

Writing literally one thought!?

Forgive me for requesting one last good old college try

You know what fuck it!

Pass the timbits

I'll just kiss grad school goodbye!

Wait I thought this was just 2 percent!

Hell no, it's 52!

We'd better get workin (Really?)

We'd better get workin (Finally!)

We'd better get workin Or we'll fail this course too!

The Greatest Discovery

One day we got this, problem, set from our prof To keep stress down, we / drank at/ treasured, Taverns in our town, see when it comes to hard math, Best to partake in heavy libation We coined this tactic as procrastination

Drunk as could be, we were shocked to see, Each page had parts, a, b, c, d, e, f, and g Doing calculus by abacus, working by candle light. It was due tomorrow morning, we'd have to stay up all night

Reading Week

We were panicked and
scared, gathered, for a final
group prayer
But then this kid from the
back row said softly "oh
contraire"
Now this is the moment
That we Engineers evolved,
she
Looked up from her
desk and then she said,
Problem solved, please

Can I have an extension?
There's still some
questions that I haven't
done.
Don't want the penalty of
being late
Can you wait? Can you
wait?

The TA said you know
I can't help you, you need
to make a plan,
You will get through this
thing
if you can, Stick it to the
man,
We all whispered
"Margaret, you gotta go
ask the prof."

She started thinking of
what to do to pull this
venture off

This was the first time we
saw her work with this
effort all year
This cause was a thing she
did hold dear
But still we knew that it
was fearsome
Had to send, penned
words that were highly
persuasive
Otherwise the prof would
think she was being
invasive
Signing' her name forgot
her student number, oh
well
Hoping that the prof
wouldn't fail her make her
life hell
A letter sent and a quest
newly begun
With more time we can
get it all done

With more time we can
get it all done (Can it wait?)

With more time we can
get it all done(Can it wait?)
With more time we can
get it all done
One more day, more time

Please just wait!

An extension's what we
need (An extensions what
we need)
We don't agree with when
you made this due (please
change it or we'll be
screwed)
Extend this we implore
Our work ethic is very
poor!
Oh, can we have another
day (Please give us a bit
more time)
The year is 1892

Future students will surely
need
More time in order to
succeed
We forge this path, we beg
and plead, oh

Tension ran deep we all
wondered
Was this plea too lavish
Can you wait?

Prof's ruled the school like
kings
And this kid could be
banished
Can you wait?

She got creative with the
task
When all other hope
vanished

We copied it
I B.Sed it all
Me, I did the work.
We failed the course
And me?

Dear Margaret, Sure.

I asked for an extension!

This will ripple through the
depths of time
From this day

We will all say

Can I have an extension?!

Finally, we're out!
A break from lectures.
No more labs to think
about.
Time to get a life.
To be more social and to
party up all night!

We've studied hard before,
And always find
There's no reward.
But this week there's no
class.
We finally have a break,
It's running out,
We can't delay.
So let's all raise our glass.

Reading Week! Aha!
Tell your friends to come
out

Let's turn up the heat
We won't leave this house
all week.

Reading Week! Aha!
Forget about tomorrow
Dance the night away.
There's a party everyday.
Reading week.

Let's bitch about our profs,
And all the times,
They pissed us off.
Some booze is what we
need.

Let's take it up a notch,
Please pass the bong.
And all the scotch.

Guys, I brought the weed!

Reading week! Aha!
Puking in the washrooms.
Parties down the street.
No one reads in reading
week.

Professor Grant sent out a
study guide?
Oh true, the midterm is in
5 days.
I need to start studying
soon.

Reading Week! Aha!
Tell your friends to come
out
Let's turn up the heat
We won't leave this house
all week.

Oh hey, Rob. Did you see
the email Professor Grant
sent out?
Nah, why?
It's about the midterm in
3 days.
Oh shit, the midterm!
Dude, he's including
Chapters 18-20.
Chapters 18-20?
Complex fluids!! FUCK!
We have to find Chad! He's
the only one who took
notes.

Reading Week! Aha!
Forget about tomorrow
Dance the night away.
There's a party everyday.
Reading week.

CHAD, we're totally
screwed! The Fluids
midterm is tomorrow!
It's okay, everything is
OKAY! We'll just cram
using the notes you took.
My notes? I think someone
used them to clean beer
off the floor!
Shit! How come no
one else is studying for
midterms!??!

We're all artscis We don't
have any.
FUCK!

Reading Week!
All of us are artscis.
It's a normal week.
Party hard, it's so easy.
Reading Week!
Thanks for this cool party.
We will never leave.
Also we broke your TV
Reading Week!

Give Them A Zero

Hey TA's, time to give out
grades
Remember that our target
average is a 48

Here we go. Giving part
marks- NO!
Unless they are perfect
they will get a big fat O
Missing the units?
Zero, zero
A rounding error
They all get a Zero!

Here is a kid who is so off
track
We'll get through these
papers in no time flat
Just give them zero, that's
the strat.

When they plead and kiss
your feet

Please booooost my mark

Say "Tough luck kid", the
grades are in
Your future looks dark.

Don't think too hard, just
spin and mark
This wheel is always right!
It's payback to the
students

Who said my class was a
waste of time!

Nothing more, than a 44.
If they come complaining
then just kick them out
the door.

They slacked off.
Now they're getting
caught.

For being shitty students
with the IQ of a rock

Check out the average. It's
a 30.
The kids'll be crying out for
mercy.
We'll prove that this course
can't be passed.
Just give them a zero

Kick their ass.
They all get a zero
A fucked up class.

Why, Dean, what brings
you here?
I heard you're giving your
class a 30% average!
Prof: Yes, and?
You cannot fail all the
2nd year students taking

thermo.
Raise the average. Now.

This kid just doodled on his
paper. (Raise his grade)
She wrote a song and it's a
banger. (Raise her grade)
They wrote "fuck you".
(What a fun prank!)
It's just their name. (At
least it's not blank!)

Raise their grade! Raise
their grade! (Raise their
grade!)

Raise their grade! Raise
their grade!

Raise their grade! Raise
their grade!

Let them pass, no one fails
this class
Or we're fired.
Cramping hands, this was
not the plan.
I'm so tired.

Shifting the average
Bell curve, bell curve
Give them the marks that,
They don't deserve
We wanna leave so let's be
fast!
Just give out some passes
Out to the masses
They're all dumbasses.
But they passed!

We Are Nerds

On the south most side of
U of T's st george campus,
there's an Engineering
faculty
We all came here thinking
it was just a degree until
we realized it was much
more

We all picked this place
as a start to a career,
We thought that that
distinction was what
makes an engineer,
But we all had a moment
where we learned it means
much more,
It's when something
changes in your very core
We are Engineers

For me I was in first year
I matched with this really
cool girl/guy on tinder, and
our first date was watching
his/her favorite sci fi movie,
Armageddon
I love this movie and all the
space scenes

And I said, well actually,
it's extremely inaccurate
because there's no
way that an asteroid of
that mass would have
anywhere near enough
gravitational force to keep
anything static, let alone
their wildly exaggerated
rovers. That was our last
date.

When talking about
science you begin to
irritate
You'll always have a hard
time tryna get a second
date

When you wear your Eng
jacket you will look like a
tool

Force and mass and
pascal,
And the right hand rule

This is who I am, an
Engineer, I am an
Engineer.
I'm an Engineer, I am an
Engineer!
Barely passed first year,
but still an Engineer!
I'm an Engineer, I am an
Engineer!

I was 2 years graduated,
and maid of honour at my
sister's wedding, in charge
of the seating plan.
I wanted it to be perfect for
her so I made a weighted
decision matrix to optimize
the arrangement.
But Stacy hates Kim, Jeff
wants to be near the bar
and grandpa needs to be
near the bathrooms.
By the time I entered
all the constraints and
parameters I had the
perfect seating plan. I just
wasn't in it.

Welcome to the program
where friends ask us to
hang out and we say,
"We have work to do!"

Whenever we are asked
'bout a time we overcame
stress we will say
"I took E.S.P!"

Whenever we hear Give It
Up we will stand up and go
"Shoulder Shoulder hip hip
ass turn clap"

Profs will always ask are
these concepts clear,
And we'll say "No!"

I'm working on an
assignment due in two
minutes, deriving a last
minute equation, my
friend says,
Dude use wolfram alpha
No man I really wanna
derive by hand-

Use wolfram alpha man!
I wanna solve this double
integral BY HAND!!
And that's when I realized

We are nerds, taking a
nerdy program, studying
nerdy things
And we watch ourselves
become,
Nerds, enrolled in a
nerdy program, watching
ourselves becoming
Bigger nerds, bigger nerds,
bigger nerds!

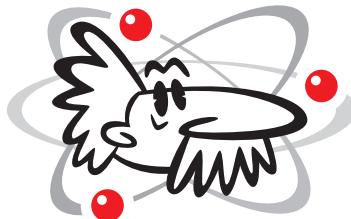

I'm an Engineer, I am an
Engineer.
I'm an Engineer, I am an
Engineer!
Barely passed first year,
but still an Engineer!
I'm an Engineer, I am an
Engineer!
I'm an Engineer, I am an
Engineer.
I'm an Engineer!

Engineering is, Not just our
degree
But a way of growing into

who we're always meant
to be
Data driven minds, nerds
that cannot spell
A little bit annoying and
we fucking love excel!
The problem sets and
purple dye and stress will
fade away
It becomes more than a
program and shitty GPA
It's the skills and thought
to change the world every
single day
So we stand tall and proud
when we say,
I'm an Engineer!

You laughed
so hard you puked.

Now you're
hungry again.

Gotta ticket stub? Use it at Einstein
